VITAMIN

01

This month, the vitamin K3 market has been stable. After a slow decline driven by weaker demand, rising raw material costs have strengthened producers' resolve to hold prices, with tighter deliveries. Further attention should be paid to factory quotations and potential price increases

AMINO ACID

02

The threonine market remains stable, with sufficient supply and moderate inquiries. End-users purchase as needed, and export offers stand at around USD 1000/MT. Prices are expected to remain steady in the short term.

API

03

Tylosin tartrate and Tilmicosin phosphate have both seen tighter supply and delivery schedules, with some specifications extended to November. Stronger demand and limited inventory may push prices upward. Current quotations are around USD 37.4/kg for tylosin tartrate and USD 42.4/kg for tilmicosin phosphate.

FOOD ADDITIVE

04

Glac Biotech's core probiotic strain CP-9 (*Bifidobacterium animalis* subsp. *lactis*, CCTCC M 2014588) has recently received FDA GRAS certification, marking progress in the probiotic and postbiotic sectors.
