VITAMIN

01

VA and VE prices fluctuated, supported by strong producer pricing intentions, while VK3 continued to rise on raw material cost pressure with active trading activity.

AMINO ACID

02

Valine remained stable with trading at USD 1.9–1.95/KG and demand-driven purchasing. Tryptophan saw limited quotations with some price increases, trading at USD 4.7–4.82/KG. Isoleucine supply tightened under controlled export orders, with prices expected to edge up. Arginine supply stayed stable, trading at USD 3.25–3.32/KG.

API

03

The veterinary API market remained stable overall, supported by firm costs and strong producer pricing stance, while demand stayed largely necessity-driven. Florfenicol prices continued to rise with active inquiries. Some producers suspended quotations for enrofloxacin and ciprofloxacin. Sulfonamides strengthened on raw material costs and are expected to remain firm. Tylosin fluctuated with demand, while oxytetracycline and amoxicillin remained stable.

FOOD ADDITIVE

04

Sucralose prices increased to USD 12.62–12.88/KG driven by raw materials, with further upside possible. Saccharin sodium continued to rise. Creatine monohydrate maintained an upward trend, trading at USD 3.38–3.64/KG with delivery schedules extending to late April.
