VITAMIN

01

According to market sources, Xinfu Pharmaceutical plans to conduct a production shutdown for maintenance from late July to early September 2026. The market will continue to monitor supply changes during the maintenance period.

AMINO ACID

02

CJ officially clarified the production schedule of its L-Methionine plant in Kerteh, Malaysia. The plant will continue normal operations until the end of August 2026, followed by a planned maintenance shutdown, with the duration still under evaluation. The company stated that the adjustment will not affect existing commercial contracts, and customer supply will remain stable.

API

03

- Topfond Pharmaceutical, a subsidiary of China Meheco, received NMPA approval for its Ezetimibe API, indicated for the treatment of primary hypercholesterolemia. The project has accumulated an investment of approximately USD 2.18 million, further strengthening the company's cardiovascular API portfolio.
- Qilu Pharmaceutical (Hainan) successfully passed the AEMPS GMP re-inspection in Spain. The inspection covered multiple complex formulations registered in Europe, with its manufacturing processes and quality management system receiving EU market recognition, supporting future commercialization in Europe.

FOOD ADDITIVE

04

China's health food approval data for H1 2026 has been released, with 119 domestic registered products, 3 imported registered products, and 1,530 newly filed products. The newly introduced health function "supporting joint and bone health maintenance" has been implemented, with 14 bone density-related products approved. Meanwhile, regulatory authorities are strengthening reviews of special food applications to promote more standardized industry development.
