

Product Catalog For Aquaculture

	Brand	Product	Feature	Package	Usage and dosage
Nutrition & Gut Health					
Reduce feed cost	BilePro	30% Bile Acid	1. Save 1% protein use in the formula 2. Save 20% lipid-soluble vitamins in the formula 3. In shrimp, save 20% cholesterol addition and save 8-10 USD/ton cost 4. Use 300-500g for 15 days to improve fatty liver in largemouth bass (Micropterus salmoides)	20kg/bag	Liver problems: 1-3kg/t For shrimp: 600-1000g/t For fish: 200-1000g/t
Anti-Vibrio	Closide	Bacillus licheniformis & Metabolites	Using 0.5g/kg reduces Vibrio by 80% in 7 days	25kg/bag	Mix in feed: 250-500g/t Splashing: 30-60g/1000m ²
Attractant	MoreBite	98.5% DMPT	1. 200g/ton weight gain rate from +9% to +66% 2. Reduce bait coefficient -6.5% to -26.37% 3. The attractive effects of BoostBite is 2.56 times that of betaine, 1.42 times that of methionine, and 1.56 times that of glutamine	25kg/bag	Crustaceans: 300—800 g/t Fish: 200-600g/t Fishing: 2000-4000g/t, especially high temperature and mild hypoxia
Anti-stress	Velyga-L	compound Vitamin & amino acid	Quickly relieve stress in 20 minutes; restore vitality; enhance immunity; and increase survival rate	1ton/bottle	Mix in feed: 3-5mL/kg Splashing: 75-120mL/1000m ²
Promoting growth	ButyEnergy-A	30%sodium butyrate+2%essential oil	Synergistic effect of sodium butyrate and essential oil 1. Sodium butyrate can enhance the antibacterial effect of essential oils and	25kg/bag	Mix in feed: 1-2kg/t Splashing: 60-90g/1000m ²
White stool, enteritis	GutEnergy	Bacillus licheniformis & Metabolites + Clostridium butyricum + essential oils + tannic acid + yucca extract	1. Prevention and treatment of white stool in shrimp 2. Prevention and treatment of bacterial enteritis in fish	25kg/bag	Mix in feed: 250-500g/t Splashing: 30-60g/1000m ²
Pigment	Carlypink	0.4%Astaxanthin	1. Red yeast ferments astaxanthin, and the retention rate of granulation at 80 ℃ is about 95%. 2. 100% absorption rate in the body, synthesis of astaxanthin is only 30%	20kg/bag	Mix with feed: 1-3kg/t
Water Quality					
Reduce ammonia, improve water quality	Active ammonia	compound probiotics	96 hours, ammonia degradation rate is 70%, nitrite degradation rate is 65%, COD degradation rate is 65%	25L/bottem	Splashing: 150-300mL/1000m ² Mix in feed: 5-10mL/kg
Improving the pond bottom	Active Pond	Bacillus subtilis+Bacillus licheniformis+Clostridium butyricum	Special processes enable the product to sink to the bottom of the pond, layer release, decompose residual bait, improve water quality, and keep water color	25kg/bag	Splashing: 300-450g/1000m ²
Specialty					
muscle growth	VeGuanid Pro	96% Guanidinoacetic Acid	Promotes muscle growth in animal	25kg/bag	300-500g/t
