## VITAMIN

01

Jilin Beisha Pharmaceutical Co., Ltd. will suspend production for maintenance on its Vitamin E line from July, lasting 10-11 weeks.

## AMINO ACID

02

Ningxia Unisplendour Tianhua Methionine Co., Ltd. will conduct an annual maintenance shutdown on its methionine production line in early August for approximately 50 days.

Recent maintenance plans announced by some solid methionine manufacturers have boosted market activity, with active inquiries and bids. Current spot market offers range between USD 2.75-2.8/kg. Given strong demand and supply adjustments, methionine prices are expected to remain firm or rise moderately.

## API

03

The Center of Synthetic Biology Technology (CSBT) has successfully developed an enzymatic epoxidation route for olefins, achieving efficient synthesis of chiral epoxide drug intermediates through enzyme evolution. This breakthrough enables highly selective and efficient production of chiral epoxides, which hold significant value in organic synthesis and pharmaceutical chemistry.

Colistin sulfate prices remain steady, with major suppliers quoting USD 13.71-14.33/kg. Limited low-priced inventory and stable buyer acceptance suggest prices will hold in the near term.

## FOOD ADDITIVE

04

Recent market trends indicate rising prices for carnitine series products:

Carnitine Base: USD 19.94-21.19/kg

L-Carnitine HCl: USD 21.81-23.06/kg

L-Carnitine Tartrate: USD 18.87-19.94/kg

Further price increases are anticipated. We will continue monitoring market developments.
