VITAMIN | Vitamin B6

01

Recently, the project of Hebei Kangsu Biotechnology Co., Ltd. to produce 400 tons of lipoic acid and 1,000 tons of vitamin B6 annually was made public on relevant websites. This project is a new construction project, covering a total area of 31,984.97 square meters and a total construction area of 15,960 square meters (the actual area is subject to the contents of the land use planning permit and the building planning permit).

AMINO ACID | Tryptophan

02

Tryptophan: Last week, some manufacturers' quotations rose slightly to around USD5.73/KG. The price increase has led to a positive market inquiry sentiment, but the demand is average. It is expected that the short-term upward momentum of tryptophan will be insufficient. In the short term, it is expected that the market situation will remain stable. Pay attention to the factory's order signing situation

API | Amoxicillin

03

Amoxicillin has seen a recent decline in market prices. The supply through trade channels is relatively abundant, the demand is stable, and the actual order is negotiated and concluded. The current market price is between USD24 and 25.2/KG. Pay attention to the changes in factory production and market demand in the future.

FOOD ADDITIVE | creatine monohydrate

04

The nutritional fortifier product creatine monohydrate has a normal delivery time in the current mainstream factories, and the domestic market transaction price has stabilized at USD 2.74 - 2.99/KG. At present, some manufacturers have suspended production. Due to the expansion of domestic factories and market conditions, prices will remain stable in the short term.
