VITAMIN

01

Yong 'an Pharmaceutical: The company makes reasonable arrangements for production suspension and maintenance based on production plans and equipment conditions every year. This time, it is expected to start the summer production suspension and maintenance in mid-July, with an estimated maintenance period of about 30 days.

AMINO ACID

02

Lysine hydrochloride: Recently, the external quotations of 98% lysine factories have been stable, the inquiry orders are moderate, and users purchase according to their needs, and the actual orders are negotiable. The market signed orders are average. It is expected that the market will remain stable with a slight decline in the short term. Pay attention to the subsequent factory signing and delivery progress.

API

03

Recently, the environmental impact assessment public notice of the second phase of the project for the annual production of 500 tons of APIs, 50 million bottles of injections and 1.1 billion tablets (capsules, bags) of oral preparations of Zhejiang Better Pharmaceuticals Co., Ltd was made on relevant websites. After the completion of this project, it will form an annual production capacity of 500 tons of APIs (430 tons of clarithromycin, 20 tons of Rasidipine, and 50 tons of esomeprazole sodium), 50 million bottles of injections, 1.1 billion tablets (granules, bags) of oral preparations, and 236 tons of intermediates (97.5 tons of hexamethyldisilysilane, 70 tons of erythromycin oxime, and 68.5 tons of methylates). The annual production capacity of by-products is 283 tons of industrial potassium bromide and 548.5 tons of industrial anhydrous sodium sulfite.

FOOD ADDITIVE

04

Recently, the detailed planning for the expansion, renewal and upgrading project of various new water-soluble protein, amino acid and derivative production equipment of Anhui Niujian Biotechnology Co., Ltd. was made public. The expansion, renewal and upgrading project of various new water-soluble protein, amino acid and derivative production equipment, with an investment of 18.1667 million yuan, will add fermentation tanks, chromatography columns, electrodialysis, dual-effect equipment, etc. After completion, it will add an annual production capacity of 20 tons of erget thiocyanine, 200 tons of soluble plant protein and 400 tons of sodium 3-hydroxybutyrate. Amino acid derivatives 100 tons per year, sweeteners 30 tons per year. It is expected to start construction in October 2025.
