VITAMIN

01

Recently, the vitamin B6 market has shown a weak trend, with most customers purchasing only as needed. Compared to the sharp price drop in June, manufacturers have shown stronger price-holding intentions in July, keeping factory offers firm. However, older inventory from distributors is being actively sold at lower prices, resulting in overall average transaction levels.

AMINO ACID

02

AHB (Anhui Huaheng Biotechnology Co., Ltd.) and global specialty chemical leader Evonik officially signed a strategic Memorandum of Understanding (MoU) in Beijing. The partnership aims to combine AHB's advanced production technology and high-efficiency biomanufacturing platform with Evonik's over 60 years of experience in essential amino acids for animal nutrition. Together, they plan to provide global customers with high-quality, sustainable bio-based amino acid products. By integrating resources and strengthening value chain collaboration, the partnership will contribute to the sustainable development of the global animal nutrition and feed industry.

API

03

Guangdong Dongyangguang Pharmaceutical Co., Ltd. recently announced its process optimization and efficiency improvement project, with a total investment of USD 310 million and an estimated construction period of 30 months. Production is expected to start in September 2027. The project includes energy-saving upgrades to power systems, enhanced recovery systems for microbial residue and salts, and improvements to wastewater and exhaust gas treatment facilities. It also involves the construction of a synthetic biology research platform utilizing AI technology to optimize the energy system. Upon completion, annual production capacity will increase to 5,500 MT for thiocyanate erythromycin intermediates, 500 MT for erythromycin API, and 2,500 MT for lincomycin hydrochloride.

FOOD ADDITIVE

04

Due to seasonal factors and ongoing maintenance, several manufacturers of creatine monohydrate have temporarily halted production. Deliveries are now scheduled for late August. Market prices remain stable at USD 2.74–2.81/KG, with a possibility of an upward adjustment in the near term.
