VITAMIN

01

Recently, Tianxin Pharmaceutical released an approval notice for its granulation production line and equipment upgrade project. The project is a reconstruction and expansion, without new land use. It includes building new workshops No. 235 and No. 236, adding spray drying equipment in the existing workshop No. 11, and installing exhaust pipes DA006, DA007, and DA008. After completion, the production capacity will be 6,000 t/a vitamin A microcapsules, 2,000 t/a vitamin B5 (calcium D-pantothenate) microcapsules, 1,000 t/a 10% β -carotene microcapsules, and 1,000 t/a 1% β -carotene microcapsules. Meanwhile, the company will cut 1,000 t/a of vitamin A acetate, 118.4 t/a of β -carotene powder, and 2,000 t/a of vitamin B5 (calcium D-pantothenate) powder from its external sales.

AMINO ACID

02

The threonine market remained weak, with factory offers adjusted to USD 1050–1100/MT. Downstream buying interest was sluggish, and the short-term market trend is expected to stay soft.

API

03

Hisun Pharmaceutical announced that its wholly-owned subsidiary, Hisun Pharmaceutical (Nantong) Co., Ltd., has received approval from the National Medical Products Administration of China for Minocycline Hydrochloride API.

Currently, major factories of Oxytetracycline Hydrochloride are under maintenance shutdown, resulting in tight supply. Transactions were concluded around USD 12.21–12.71, while spot availability through trade channels was scarce, keeping inquiries active. Prices are expected to stay firm in the short term, with further attention needed on raw material oxytetracycline supply, factory restart progress, and downstream demand.

FOOD ADDITIVE

04

In the food additives market, sodium saccharin anhydrous was traded around USD 4.7–5/kg, with short-term prices expected to remain stable.
