VITAMIN

01

On October 28, market sources reported that a biotin manufacturer increased the quotation for Biotin 2% feed grade to USD 3.54/kg. At the same time, Zhejiang Medicine Co., Ltd. raised its Vitamin A 500 feed grade contract price to USD 8.85/kg. The vitamin market remains firm, with some producers limiting order quantities amid tighter spot supply and rising demand. Buyers are advised to closely track factory pricing trends and consider early procurement to manage potential volatility.

AMINO ACID

02

The lysine market remains subdued, with factory quotations slightly soft and limited trading activity. Lysine 98% is currently priced between USD 860–880/MT, and downstream purchasing remains cautious. In the short term, the market is expected to stay weak. Buyers should monitor factory delivery schedules and inventory conditions to mitigate supply risks.

API

03

This week, delivery timelines for Tylosin Tartrate and Tilmicosin Phosphate continued to tighten, with mainstream manufacturers gradually raising prices amid strong inquiry activity. Current quotations stand around USD 38/kg for Tylosin Tartrate and USD 43/kg for Tilmicosin Phosphate, with market transactions expected to reach new annual highs.

FOOD ADDITIVE

04

Recently, it was reported that Qianjiang Yongan Pharmaceutical Co., Ltd., through its subsidiary Yongan Kangjian Pharmaceutical (Wuhan) Co., Ltd., is collaborating with Xipa Foods to develop a new ovalbumin-based product aimed at enhancing the application of proteins in functional foods and sports nutrition. The product is currently in the pilot promotion phase and is expected to expand into the broader nutritional supplement market. This collaboration reflects a growing trend among food additive companies toward upstream–downstream innovation to capture opportunities in high-value protein ingredient segments.
