VITAMIN 01

Following recent signs of rising biotin prices, Shengda Biotech suspended its biotin quotations on October 29. The move indicates tighter supply and potential for further price increases in the near term.

AMINO ACID 02

The methionine market remains quiet with limited transactions and weak sentiment. Current solid methionine prices range between USD 2.63–2.65/KG, and a soft market trend is expected to continue in the short term.

API 03

- Zhejiang Qianjiang Biochemical Co., Ltd. has begun trial operations for its biopesticide relocation project, focusing on gibberellic acid and environmentally friendly formulations, with an annual capacity of 3,261 tons of active ingredients and 20 million tablets.
- Oxytetracycline HCl supply remains tight, with mainstream transaction prices at USD 12.52–13.02/KG and limited spot availability in trade channels. With API China scheduled for mid-November, supply dynamics and demand trends warrant close attention.

FOOD ADDITIVE 04

Creatine monohydrate prices remain stable, supported by raw material costs and steady demand. Factory quotations range from USD 3.03–3.16/KG, with deliveries scheduled through late November. A mild price increase cannot be ruled out in the coming weeks.
