VITAMIN

01

- Trimethylamine, the key raw material for choline chloride, continued to rise this week, increasing by USD 12–25/MT to USD 700–710/MT. Ethylene oxide supply remains ample, with prices showing slight softness.
- Choline chloride 60% powder (corn cob carrier) is quoted around FOB USD 515/MT. The market is expected to stay stable with a mild upward trend, depending on developments in upstream raw material supply and pricing.

AMINO ACID

02

Akmola Region is working with East Hope Group on a USD 500 million grain deep-processing project, which will be developed in two stages. The first stage involves a USD 20 million investment focused on feed production and grain-drying equipment manufacturing. The second stage will expand into a complete grain deep-processing chain, including amino acids and other high-value products. The project is designed to process 300,000 tons of wheat annually.

API

03

Zhejiang Hisun Pharmaceutical announced that its subsidiary, Zhejiang Hisun Animal Health Co., Ltd., will invest USD 14.08 million to establish a wholly owned subsidiary and build a prescription pet food project in Taizhou, Zhejiang Province. With a total planned investment of USD 28.17 million, the project will be implemented in two phases: a 24-month construction period followed by capacity expansion. Once completed, the facility will add an annual output capacity of 10,000 tons of prescription pet food.

FOOD ADDITIVE

04

Recently, the National Standardization Administration Committee has solicited public opinions on 9 recommended national standards (drafts for approval), including "Determination of Soy Isoflavones in Health Food (Draft for Approval)"
