## VITAMIN

01

According to market sources, all major producers of vitamin E 50% feed grade have suspended quotations and contract signing. Market inventories have declined to extremely low levels, with distributors largely holding stocks and offering limited volumes to test the market. Factory delivery schedules are generally extended to late January, with some orders already booked into February, indicating continued tight supply in the short term.

## AMINO ACID

02

Mainstream isoleucine producers are quoting between USD 2.76–2.88/KG. With increasing contract activity, deliveries have tightened, and some producers have suspended quotations and contract signing. Lead times are now mainly scheduled for January to February. In the short term, the tight supply situation is expected to persist, with market focus on producers' order intake and delivery execution.

## API

03

- Recently, Weifang Kangan Biotechnology Co., Ltd. disclosed plans for a 5,000 MT/year veterinary pharmaceutical intermediate project, with a total investment of RMB 180 million. The project covers approximately 51 mu, with a total construction area of about 24,000 square meters. Upon completion, it will include annual capacities of 500 MT methylbenzyl trimethoprim lactate, 500 MT albendazole, 2,000 MT carbasalate calcium, 1,000 MT oxytetracycline HCl, and 1,000 MT terephthalaldehyde.
- In addition, Zhejiang Hisun Pharmaceutical Co., Ltd. announced that its wholly owned subsidiary, Hisun Pharmaceutical (Hangzhou) Co., Ltd., has received the European Pharmacopoeia Certificate of Suitability (CEP) for Everolimus API issued by the EDQM.

## FOOD ADDITIVE

04

Recently, updates in the National Health Commission's administrative licensing system show that "Krill Oil" and "Luohan Ginseng" have been re-added to the list of newly terminated novel food ingredient reviews. The total number of new food raw materials that have been terminated from the review process has reached 95.
