VITAMIN

01

- According to Shanghai Securities News, Tianxin Pharmaceutical stated during its May 11 performance exchange meeting that the company plans to expand into products such as 25-hydroxy vitamin D3 and tocopheryl acetate, further strengthening customer service capabilities and market coverage while continuing to build a globally competitive vitamin manufacturing platform.
- Against the backdrop of ongoing industry competition and consolidation, the company will continue focusing on its core business by advancing capacity expansion, technology upgrades, and global market development. Tianxin Pharmaceutical also plans to accelerate product certifications and applications in pharmaceutical and food sectors, while strengthening the development of key raw materials to improve upstream supply stability and reduce production costs.

AMINO ACID

02

According to market sources, Ningxia Unisplendour Tianhua Methionine Co., Ltd. plans to carry out its annual methionine plant maintenance starting in mid-July, with the shutdown expected to last around 50 days.

API

03

Recently, inquiries for levamisole hydrochloride have increased across the market. Supported by controlled supply strategies from major producers and relatively low inventory levels, transaction prices have continued to rise steadily. Current market quotations are around USD 48/KG.

FOOD ADDITIVE

04

- According to information released by the China National Intellectual Property Administration, Cabio Biotech Co., Ltd. has officially obtained authorization for its astaxanthin fermentation production patent (Patent No. CN115558693B).
- The patented technology utilizes a Schizochytrium strain (CCTCC M2021564) developed through mutation breeding from marine-derived strains for astaxanthin fermentation production. The strain demonstrates high astaxanthin productivity, and the fermentation products are rich in DHA astaxanthin esters, offering strong industrial application potential and commercial value.
