VITAMIN

01

Some vitamin C producers have recently resumed quotations at around USD 3.5-3.6/KG. Meanwhile, the industry is approaching a concentrated maintenance period expected to last approximately 2-3 months, which may tighten overall market supply and support further price increases.

AMINO ACID

02

BAFENG PHARMACOCHEMISTRY has released the first environmental impact assessment announcement for its high-purity amino acid API expansion project. With a total investment of approximately USD 3.75 million, the project will add two purification production lines covering products including lysine, leucine, isoleucine, valine, tryptophan, glutamic acid, and methionine.

API

03

According to the Official Journal of the European Union, the European Commission issued Regulation (EU) 2026/1122 on May 27, 2026, approving *Enterococcus lactis* NCIMB 11181 as a feed additive for poultry for fattening, laying and breeding poultry, and ornamental birds. The product is classified as a 'technological additive' under the functional group of 'gut flora stabilizers', with authorization valid until June 16, 2036.

FOOD ADDITIVE

04

Creatine monohydrate prices have remained stable recently in the nutritional supplement market. Mainstream producer quotations are around USD 3.25-3.5/KG, with delivery schedules extending into June. However, future price weakness cannot be ruled out depending on market demand conditions.
