VITAMIN

01

Prices for Vitamin B12 Feed Grade 1% remain firm among major producers, with current market levels at approximately USD 12.75-13.66/KG. Pure Vitamin B12 prices have edged slightly higher, while quotations in the trading market remain generally stable. Market participants are closely monitoring producer supply conditions and upcoming maintenance schedules that may affect availability.

AMINO ACID

02

CJ Biomaterial has announced that its arginine production line in Liaocheng will undergo annual maintenance beginning in early July. In addition, the shared production line for arginine, valine, and isoleucine at its Shenyang facility is scheduled for routine maintenance in mid-August. With global arginine demand remaining strong and short-term production capacity temporarily constrained, market supply is expected to tighten. CJ Biomaterial stated that it will prioritize supply commitments to key customers and existing contracts.

API

03

- On June 6, the global R&D headquarters of CHIA TAI Tianqing Pharmaceutical, representing a total investment of RMB 1.8 billion, was officially inaugurated in Shanghai. During the International Biopharmaceutical Innovation Development Forum held on the same day, Xie Chengrun, Chief Executive Officer of China Biologic Products Holdings and Chairman of Tianqing Pharmaceutical, stated that the new headquarters will serve as a foundation for building a cross-disciplinary and cross-industry innovation ecosystem, further promoting biopharmaceutical development throughout the Yangtze River Delta region.
- Meanwhile, Hvsen Biotechnology Co., Ltd announced that "Grapirant Tablets," jointly developed by its subsidiary Hubei Huisheng Biotechnology Co., Ltd and partner organizations, have been approved by China's Ministry of Agriculture and Rural Affairs as a new veterinary drug and have been granted a New Veterinary Drug Registration Certificate, further strengthening the company's animal health product portfolio.

FOOD ADDITIVE

04

Recently, Scitop Biotechnology stated in response to investor inquiries that its proprietary probiotic strain, Bifidobacterium animalis subsp. lactis ProSci-246, has been successfully incorporated into the company's ready-to-consume probiotic products, which are already commercially available. The company noted that it will continue to follow advancements in probiotic science and technology while steadily expanding product development efforts in line with market demand.
