## VITAMIN

01

- This week, rising trimethylamine prices helped stabilize the choline market. Customer inquiries increased, while delivery schedules at major producers remained tight. Current market quotations for Choline Chloride 60% Powder are around USD 760–780/MT.
- Yongan Pharmaceutical has been granted an Indonesian invention patent covering its taurine production technology. With this latest authorization, the company has completed patent protection for the same core technology across major global markets, including China, the United States, Europe, Japan, and Indonesia, further strengthening its global competitive position in taurine manufacturing.

## AMINO ACID

02

The threonine market remains weak but generally stable. Mainstream producer quotations have softened slightly compared with last week, with current transaction prices at approximately USD 1000–1030/MT. Downstream buyers continue to purchase primarily based on immediate demand, and prices are expected to remain under mild pressure in the near term.

## API

03

Amoxicillin prices remain stable, with limited availability of low-priced material in the market. Current transaction prices are around USD 23.77–24.44/KG, while downstream purchases continue to be driven by immediate demand. Market participants are closely monitoring raw material costs and supply conditions.

## FOOD ADDITIVE

04

China Feihe Limited has officially commenced production at China's first intelligent manufacturing line for high-purity  $\alpha$ -lactalbumin, enabling large-scale domestic production of this premium dairy protein. The project marks an important step toward strengthening the local supply chain for high-end infant nutrition ingredients.
