Pls note factories will come into summer maintenance and stop production for 1-2 months, which will bring influence to delivery time. Advise to check if your stock could cover till Q4.

DL-Malic acid

The price of Malic Acid market price is slightly decrease in this month, due to raw materials price decreasing and weak demands. The current market price is at USD1700-1900/MT.

Preservatives

Sorbic Acid /Potassium Sorbate

At present, these 2 products are a downward trend. The price of sorbic acid is 2.95usd/kg, and the price of potassium sorbate is 2.3usd/kg.

Sodium Benzoate

The price of raw materials for producing sodium benzoate is decreasing, which has led to the current downward trend in the market. The price is around 0.95-1.05usd/kg.

Calcium Propionate

Calcium propionate is currently stable and there has been little change in the market. The price is around 0.8usd/kg, can focus more on it.

Antioxidants

Sodium Erythorbate

Current factory offers for sodium erythorbate at \$2.70–\$2.80/kg, supported by plant shutdowns for scheduled maintenance which have prompted producers to lift their asking prices. However, some traders are still offering material at around \$2.40/kg in an effort to offload their existing stocks, creating a notable spread between official factory quotes and tradable spot levels. This pricing disparity reflects a market where production-side firming coexists with active destocking by certain traders, who are prioritizing volume over margin in the near term.

Sodium Ascorbate

Being influenced by the overall upward trend in the vitamin C market, price offer at about 4.5usd/kg
