VITAMIN

01

Recently, the Vitamin E market has shown signs of recovery after a period of consolidation, with the market potentially entering a new upward cycle. The rebound is supported by multiple factors, including rising raw material costs, continued inventory reduction among downstream users, stronger price-support sentiment from producers, and intensified industry-wide maintenance shutdowns. For international buyers, it is recommended to closely monitor supplier availability and adjust purchasing schedules in advance, as further supply tightening may increase procurement costs and extend delivery lead times.

AMINO ACID

02

On August 4, Jinyufeng Biotechnology released its latest lysine quotations:

- L-Lysine Sulfate 70%: USD 555/MT
- L-Lysine Sulfate 80%: USD 595/MT
- L-Lysine HCl 98.5%: USD 925/MT.

API

03

Recently, Hisoar Pharmaceutical announced a technical upgrade project with a total investment of USD 17.48 million. The project will utilize existing facilities and new production lines to expand capacity for multiple APIs, including Pregabalin (100 MT/year), SNAC (100 MT/year), Avibactam (10 MT/year), Faropenem (20 MT/year), Tebipenem (5 MT/year), Enrofloxacin (1,000 MT/year), and Enrofloxacin Hydrochloride (1,000 MT/year).

FOOD ADDITIVE

04

Recently, the Key Laboratory of High-value Utilization of Antarctic Krill Resources under China's Ministry of Agriculture and Rural Affairs was officially launched in Dalian, Liaoning Province. Meanwhile, the first-phase health food production base of the Antarctic Krill Biotechnology Park was put into operation, and the second-phase high-quality krill oil production base commenced construction. The laboratory will focus on the high-value utilization of the Antarctic krill industry chain, covering krill oil production, functional food development, pharmaceutical applications, and related biotechnology innovation.
