Vitamins

Vitamin A

The current market's price for Vitamin A P1.7Miu at USD53/kg, the price of Vitamin A P250CWS at above USD16/kg, and Vitamin A acetate 325CWS is around USD20/kg, and the price for Vitamin A acetate 500CWS is around USD28/kg.

Vitamin D3

The market trend of VD3 has dropped. At present, the market price of VD3 100,000 is around USD8.5/kg, and the market price of VD3 1MIU is around USD51/KG based on different manufacturers. But as a manufacturer, we can support competitive prices.

Vitamin E 50% CWS /VE Oil 98%

Vitamin E Oil has dropped a little recently. At present, the market price of 98% vitamin E oil is around USD25/KG, and the market price of 50% Vitamin E CWS is around USD17-18/KG. We can offer competitive prices from various brands.

Vitamin C

The Vitamin C market remains in a firm but stagnant phase this month, with domestic prices holding at RMB 22-23/kg for 99% powder, while manufacturers' official offers are quoted higher at RMB 23-27/kg, though actual transactions remain limited due to weak downstream demand. On the supply side, major producers are maintaining their firm stance with summer maintenance shutdowns reducing overall capacity, which provides price support. Export prices are currently ranging between USD 2.40-2.50/kg FOB, depending on order size and destination. For our business, this means we are in a seller-favored position with room for negotiation on larger orders, and we recommend maintaining competitive pricing while leveraging the firm market undertone to protect margins.

Vitamin B1 Mono/Hcl

The Vitamin B1 market remained stable in July. Current FOB prices are around USD 32/kg for Vitamin B1 Mono and USD 36/kg for Vitamin B1 HCl, with market transactions staying relatively steady.

Vitamin B2 98%

The Vitamin B2 98% market remained stable in June, with no significant changes compared with the previous month. Current market prices from mainstream manufacturers are around USD29-45/kg, while overall supply and demand conditions remain balanced.

Niacin/Nicotinamide

The food-grade Niacin and Niacinamide markets softened slightly in July, as transaction activity was weaker than in June. Current FOB cost levels are around USD 5.55/kg for both products. However, underlying raw material prices remain firm, and the market is expected to fluctuate within a narrow range in the near term.

D-Calcium Pan/Vitamin B5

The market price of calcium pantothenate remained stable in July, with no significant fluctuations observed. Current FOB prices are around USD5.5/kg, while supply and demand conditions remain balanced.

Vitamin B6

The Vitamin B6 market remained relatively stable, while price levels vary significantly among different suppliers due to differences in production costs, inventory positions, and supply conditions. Current market quotations are around USD 13–14/kg FOB China.

Folic Acid

The price of folic acid also soft in the past time, supported by balanced supply and demand conditions. Current FOB prices are around USD38-45/kg, with mainstream manufacturers keeping offers relatively firm.

Biotin 98%

The biotin market price declined slightly in June compared with the previous period. Current FOB prices are around USD 140-150/kg, with overall market demand and supply remaining relatively stable. Manufacturers are maintaining steady production and delivery schedules.

B12 / B12 1%

Market price keeps stable for Vitamin B12 product. The market price of B12 pure is currently 1280USD/kg, for 1% at around 30USD/KG.

Sweeteners

Glucose series

In this month, the prices gradually stable in the market. The price of glucose anhydrous is at about 0.63~0.65USD/KG, and the transaction price of glucose monohydrate in the market is about 0.43-0.47USD/KG.

Aspartame

The price of Aspartame is stable. Currently, the price is stable at about USD 9-10/KG.

Erythritol

The market for erythritol is stable. The market price of FCL is around 1.35-1.45USD/KG according to different manufactures.

Sucralose

The price of Sucralose is stable, now the current market price level is around USD12.5-13/KG.

Saccharin Sodium

The market is stable. Current market price FOB USD6-6.5/KG

Acidulants

Citric acid series

The market price of citric acid anhydrous is 0.80-0.83/KG, and the market price of citric acid monohydrate is 0.72-0.75/KG. Prices have dropped slightly this month. Factory delivery pressure has also reduced.

Taurine

Recently market tends to be tight because of the maintenance plan of major factories. Some deliveries even extends to Sep. Now market price is at around 3.5-3.8USD/KG.

DL-Malic acid

The price of Malic Acid market price is slightly decrease in this month, due to raw materials price decreasing and weak demands. The current market price is at USD1600-1800/MT.

Preservatives

Sorbic Acid /Potassium Sorbate

Recently, the market has been rather quiet and the prices have remained unchanged. The price of sorbic acid is 2.95usd/kg, and the price of potassium sorbate is around 2.3usd/kg.

Sodium Benzoate

The cost of raw materials for production has gone up, which has led to an increase in the price of the products. The current price has risen to 1.1-1.15usd/kg.

Calcium Propionate

Calcium propionate is currently stable and there has been little change in the market. The price is around 0.8usd/kg, can focus more on it.

Antioxidants

Sodium Erythorbate

Current factory offers for sodium erythorbate at \$2.70–\$2.80/kg, supported by plant shutdowns for scheduled maintenance which have prompted producers to lift their asking prices. However, some traders are still offering material at around \$2.40/kg in an effort to offload their existing stocks, creating a notable spread between official factory quotes and tradable spot levels. This pricing disparity reflects a market where production-side firming coexists with active destocking by certain traders, who are prioritizing volume over margin in the near term.

Sodium Ascorbate

Being influenced by the overall upward trend in the vitamin C market, price offer at about 4.5usd/kg

Natural Vitamin E

On the natural vitamin E front, our cost for natural VE 700 IU is table about 37.5-38usd/kg Overall, the natural VE series has shown little change compared to previous levels, with market prices remaining relatively stable and no significant fluctuations observed in the near term.
