VITAMIN

01

The vitamin market showed slight fluctuations recently. Vitamin C prices rebounded strongly after producers raised prices and subsequently suspended quotations and new orders. Vitamin E producers remain off-market, with transaction prices continuing to edge higher last week. Choline Chloride prices also increased slightly following a rise in trimethylamine costs, prompting more active purchasing. Calcium Pantothenate, Vitamin B2, Vitamin B6, and Biotin remain at low levels.

AMINO ACID

02

The bulk amino acid market remained in a bottom-range consolidation. Mainstream producers raised L-Lysine HCl 98.5% quotations slightly, while some delivery schedules remain tight. Downstream buyers continue to purchase mainly on demand, with FOB prices at USD 860-880/MT. L-Lysine Sulphate 70% remained stable at USD 550-570/MT. Threonine prices stabilized after a slight increase last week, as limited downstream acceptance has constrained further price gains, with FOB prices around USD 950-960/MT.

API

03

The veterinary API market remained in bottom-range consolidation last week, with some products showing divergent trends. Florfenicol continued to strengthen amid producer maintenance shutdowns and suspended quotations, with mainstream prices around USD 21.80/KG. Amoxicillin remained weak with negotiated transactions, while Tylosin Tartrate and Tilmicosin Phosphate continued to fluctuate at low levels. Oxytetracycline and Enrofloxacin remained relatively stable.

FOOD ADDITIVE

04

In the sweetener segment, Sucralose remained stable, with domestic transactions at around USD 12.28-12.55/KG. In nutritional ingredients, Creatine Monohydrate remained around USD 3.00-3.30/KG, although some producers have temporarily suspended quotations due to raw material costs, with deliveries scheduled through September. L-Carnitine from mainstream brands remained stable at USD 23.77-25.10/KG.
