VITAMIN

01

Trimethylamine (TMA) was quoted at USD 1,056.66/MT, down USD 39.62/MT from the previous day, while Ethylene Oxide (EO) stood at USD 1,228.37/MT. Rising raw material costs have pushed Choline prices to elevated levels. Downstream buyers remain cautious, with limited new orders and a market characterized by firm quotations but light trading. Producers are mainly fulfilling existing orders, while further raw material movements remain a key factor to watch.

AMINO ACID

02

On September 14, two *Corynebacterium glutamicum*-fermented amino acids from CJ—L-Threonine and L-Isoleucine—received positive EFSA safety evaluations. L-Threonine was assessed for use in feed for all non-ruminant species, while L-Isoleucine products at $\geq 90\%$ and $\geq 65\%$ were assessed for use in feed for all animal species. The dual EFSA approval provides strong, authoritative EU backing for CJ's further expansion in the global feed additive market.

API

03

- Xinjiang Guoyu Pharmaceutical Co., Ltd. recently announced a 3,000 MT/year Tylosin-series production project in Shihezi, Xinjiang, with a total investment of approximately USD 163.28 million. The project will include 2,500 MT/year Tylosin Tartrate and 500 MT/year Tylosin Phosphate.
- The Sulfonamide market remains generally stable following earlier increases in raw material costs. Sulfadiazine (Sodium) is trading at around USD 22.2–22.85/KG, while Sulfamethazine (Sodium) is around USD 15.6–16.25/KG. Future prices will depend on downstream demand and raw material costs.

FOOD ADDITIVE

04

Tianjin Ringpu Bio-Technology Co., Ltd. recently reported that its mycelial protein is rich in β -glucans and B vitamins, with applications in plant-based meat, baked foods, healthy snacks, meal replacements, and protein bars. The product has obtained approval as a new food raw material and a pilot-scale SC production license in China, while U.S. and European registrations are progressing as planned.
